

GROW A LAWN

LAY NEW TURF OR BOOST A TIRED LAWN

TURF UNDERLAY

TURF SPECIAL

- Natural soil blend for use as a turf underlay
- Well draining, open medium for fast establishment

APPLICATION INSTRUCTIONS:

- Care should be taken to remove existing vegetation, including weeds. If necessary, use glyphosate herbicide, following manufacturers instructions.
- Apply a minimum of 50mm or depth required to get desired level.
- Water well to ensure turf is laid on a moist surface.
- Avoid compacting ground when installing underlay and turf.

TURF SPECIAL

50-100mm

EXISTING GROUND

GRASS SEED

ORGANIC TOP DRESS

- Top dress is also recommended for seeding
- Fine consistency for good seed to soil contact
- Retains moisture
- Provides insulation

APPLICATION INSTRUCTIONS:

- Check sowing instructions before selecting grass seed.
- Always cultivate existing ground first by removing vegetation and roughening ground. Grass seed will not establish successfully if planted straight over existing turf.
 - Apply 10mm of Organic Top Dress to provide a non-crusting, moist seed bed.
 - Spread seed according to supplier instructions. Do not over apply.
 - Keep area watered until seed establishes.

CULTIVATE EXISTING GROUND FIRST

TOP DRESS

ORGANIC TOP DRESS

- High performance blend
- Sand, soil, compost & manure
- Minimal crusting
- Organic nutrients
- Superior water holding

APPLICATION INSTRUCTIONS:

- Top dress can be applied year round but spring is an optimum time to apply.
- Mow lawn before applying top dressing. This allows easier levelling and a more even spread of soil.
 - If desired, aerate area to ease compaction.
 - Apply to 10mm deep and rake to spread. Ensure that leaf tips are showing through the surface.
 - Always water well after applying.

POINTS TO CONSIDER

Having a luxurious lawn requires care when laying and also regular maintenance.

Consumers will often spend a small fortune on turf and then scrimp on the base it needs to grow. This may lead to increased costs later in water and fertilizer, or causes disappointment when the lawn does not establish well.

There are several options available for establishing new grass or boosting an existing lawn.

- A natural soil is available for use as a turf underlay.
- A premium high organic blend can be utilised for grass seeding, as a top dress or for sports field renovation.

Both of these products have been designed to provide grass a quality media for fast establishment and long term vitality.
